DETAILED ACTION

1. The amendments filed 10/19/05 and 11/22/05 have been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshie et al. (JP 2002060127 A). Yoshie discloses a sheet postprocessing apparatus that includes a first crease forming unit constituted by a pair of first folding rollers (R1,R2) and a folding plate (661); a second crease forming unit constituted by a pair of second folding rollers (R4,R5); a first abutting member (65); a second abutting member (655A); a first driving device (M5); a second driving device (653); a setting unit (see abstract); and a controller.
4. Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Tamura et al. (US 6,746,390). Tamura discloses a sheet postprocessing apparatus that includes a first crease forming unit constituted by a pair of first folding rollers (83,84) and a folding plate (82); a second crease forming unit constituted by a pair of second folding rollers (84,85); a first abutting member (78); a second abutting member (89); a first driving device (M5); a second driving device (see col. 10, lines 38-43); a setting unit (see col. 10, lines 25-33); and a controller (100,200).

Art Unit: 3651

The applied reference has a common assignee and has common inventors with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
